

TruArc Weld 1000 Network capability

Extension Cube Weld

Digital networking creates transparency

It is now possible to integrate the TruArc Weld into networked production with the easy-to-install hardware extension. This enables the use of the production status interface and integration into Oseon Analytics or another production control software. This improves your business processes and increases your profits.

Your benefits at a glance:

Benefit from the Extension Cube Weld which also improves the TruArc Weld 1000's networking capability

- Network connection in three hours
- Remote support for the TruArc Weld 1000
- Network drive setup for robot program exchange
- Easy robot program backups
- Provision of machine data via OPC UA for condition monitoring and analysis
