Laser World of Photonics: Industry 4.0, quantum, 3D-printing and co

Laser applications are an indispensable tool in modern production supporting solutions like microprocessing, additive manufacturing, quantum technologies and more. But what exactly are the newest innovations at LASER World of Photonics?

Martin Lechner, Executive Director of Messe München, Thomas Fehn, Chief Sales Officer at TRUMPF Laser Technology, and Constantin Häfner, Director at Fraunhofer ILT Aachen tell us all about it.
