INTECH 2023: TRUMPF shows these solutions

From March 21 to 24, TRUMPF will once again open its doors to visitors from all over the world as part of its INTECH in-house exhibition. In keeping with the 100th anniversary of the high-tech company, the focus will be on sustainability. But what new solutions from the machine tool and laser technology sectors await the guests? We asked Marcella Montelatici, Managing Director for Sales and Services at TRUMPF Machine Tools, and Thomas Fehn, Managing Director for Sales and Services at TRUMPF Laser Technology.
