LASER trade fair: Hagen Zimer on TRUMPF innovations in laser technology

TRUMPF is presenting its innovations at LASER – World of Photonics, the leading trade fair for laser technology. In this video, Hagen Zimer, CEO of TRUMPF Laser Technology, explains how the high-tech company helps its customers implement their laser applications as a solution provider.

Whether battery manufacturers, electronics producers, or many other industries, they all depend on reliable and highly productive manufacturing systems. TRUMPF meets these requirements with its new generation of TruFiber lasers. These new fiber lasers are at the heart of the production solutions of TRUMPF. In combination with programmable optics and AI-supported sensor technology, they enable users to increase productivity in their manufacturing and improve the quality of the components they produce.
