A playground for physicists and technologists

ATHANASSIOS KALIUDIS

Laser research at TRUMPF

TRUMPF in Ditzingen has one of the world's sophisticated equipped laboratories for laser research.

What do laser researchers dream of, what makes their hearts beat faster? From first-class equipped laboratories with the

finest measuring technology, simulation software and analysis methods. Welcome to the laser advance development of TRUMPF!

The laser researchers at TRUMPF deal with fundamental challenges of optics: How does light behave? How can the laser be mastered? Is light now wave or particle or both and if so why and how many?

A video about one of the best laboratories for laser research worldwide.
