

DepositionLine
Technology package

Laser metal deposition

01

**Everything from
the same source**

03

Modular design

02

High flexibility

04

**Reliable and
competent**

01

Everything from the same source

Designed with optimal compatibility – at TRUMPF you get a complete package containing the beam source, powder feeder, optics and nozzles.

02

High flexibility

Profit from TRUMPF's laser competence and find the beam source in our portfolio that best suits your requirements.

03

Modular design

Put together the technology package that perfectly supports your OEM solution.

04

Reliable and competent

With individual TRUMPF application consulting and worldwide service, you are ensured of an optimal support.

Open up new markets for yourself with laser metal deposition. Coating, repair work and additive manufacturing – with the DepositionLine Technology package you get an individual solution consisting of beam source, powder feeder, optics and nozzles.

No matter whether you need a special laser metal deposition system for the manufacture of your end product or would like to add a laser metal deposition machine to your portfolio, the DepositionLine Technology package is the right product for you.

TRUMPF DepositionLine Technology package

Beam sources	TruDisk disk laser, TruDiode diode laser
Powder feeder	Vibration powder feeder, disk powder feeder
Processing optics	BEO D70 – LMD with (programmable) motorized focusing
Process nozzles	Multijet nozzles, coaxial nozzles, nozzle for high-speed laser metal deposition

Subject to alteration. Only specifications in our offer and order confirmation are binding.
