Cordless Alliance System

Benefit from 100% compatibility with machines, CAS rechargeable battery packs and rechargers from various manufacturers work in this one system. CAS provides the most efficient rechargeable battery system in the industry from Metabo and over 30 years of experience in rechargeable batteries which is now also available for TRUMPF Power Tools. How do you benefit from this? Highest degree of reliability, clear cost advantages and top investment security.

Cordless Alliance System

33 brands, 300 machines, 1 battery

Cordless Alliance System (CAS) is a group of leading electric power tool brands, offering you a large selection of powerful machines. You can easily combine the 18V rechargeable batteries and chargers together. The comprehensive system emphasises sustainability and makes it possible for you to greatly reduce the number of rechargeable batteries in your company.

100% compatible

Everything works together: 18V battery-powered machines, rechargeable batteries and chargers from any brand. Clear cost advantage thanks to multiple use of existing rechargeable batteries. No matter if it is Li-Ion or LiHD technology, 2.0 Ah, 4.0 Ah, 5.2 Ah, 5.5 Ah, 8.0 Ah or 10.0 Ah.

Twice the freedom

CAS means you do not have to depend on cables. You can use machines from different manufacturers with one rechargeable battery.

Leading rechargeable battery technology

CAS represents a sophisticated rechargeable battery system that you can rely on for standard and special applications.

One battery, many solutions. 100% compatible.

Electric- and cordless tools

TRUMPF slitting shears

TRUMPF slitting shears are used in numerous industries, for example in drywall construction, the construction of façades, ventilation and air duct construction, automobile body and aircraft construction. They stand out due to their high cutting speed, distortion-free cuts and practical details.

Particular strengths:

 Fast slitting process free of deformation

The material is not deformed during processing, meaning that you achieve the highest cutting quality.

 Fast processing with dimensional accuracy

The unimpeded view of the cutting line means that you can work quickly and precisely, even in curves.

 1 machine for the most diverse applications

A selection of different cutters and cutting blades is available for perfect cutting results and high service lives.

Ready for use - fast

Slitting shears do not need to be adjusted, meaning they are ready for use in the blink of an eye.

No scratches on the sheet surface

The defined and spiral-shaped rolling of the chip prevents scratches on the workpiece.

 With a quick-release locking bolt, you can change the blade in only 15 seconds without using tools. The cutters are also easy to replace, you can even turn them to double their service life (except cut guides corrugated TruTool C 200).

TruTool C 160 with LiHD battery 12V

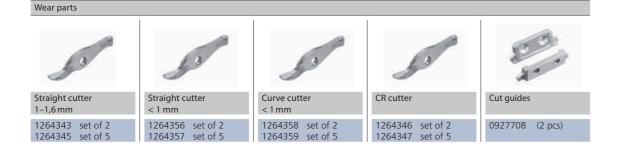

Included accessories

Straight cutter 1–1.6 mm (integrated), cut guides (integrated), hex head wrench SW 2.5, 2x battery 12V LiHD 4 Ah, Charger LG 18V–36V, belt clip, TRUMPF Box S2

Product features

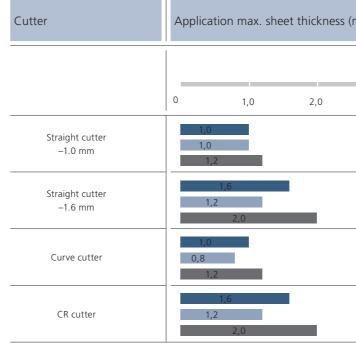

- Most cost-effective model
- Light weight and handy. Small starting drill hole
- For application where chip clipping is not necessary
- Ideal for cutting into sections and curved cuts
- Intelligent battery management, brushless motor and Power Head Technology
- Cordless Alliance System: 12V battery compatible within their performance class - also with CAS partner machines and chargers (12V-36V)

SPECIAL MACHINES

TRUMPF shears

TRUMPF provides tinsmiths, plumbers, electricians, heating and ventilation specialists, as well as container or elevator constructors with numerous shears which are optimally adapted to their intended purpose.

Particular strengths:

Unbeatable performance on curves

IruTool

The shears are designed for the highest manoeuvrability, even on tight, difficult radii.

Chip-free slitting process

Using the sheet metal cutters, you can cut without burrs and thermal influences.

 Clear view of the work surface and cutting line

A clear view allows you to cut accurately according to the scribed line, in any position – even upside down.

Multi-edge cutter for costeffective work

The blades are simple to change and can be turned several times.

Shears

Included accessories

Cutter (integrated), screwdriver Torx PB 410, 2x battery 12V LiHD 4 Ah, charger LG 12V-36V, belt clip, TRUMPF Box S2

Product features

- Cutters are interchangeable; 2-sided use
- Easily rotatable machine
- Perfect for flush-cutting ventilation pipes at walls and ceilings
- For cutting and trimming C-L-U profiles, corrugated and trapezoidal sheet metal
- Intelligent battery management, brushless motor and Power Head Technology
- Cordless Alliance System: 12V battery compatible within their performance class - also with CAS partner machines and chargers (12V-36V)

TruTool S 160 LiHD battery 12V

Included accessories

Cutter standard, hex head wrench SW 2 and SW 3, 2x battery 12V LiHD 4 Ah, charger LG 12V-36V, belt clip, TRUMPF Box S2

Product features

- Easy to exchange 4-sided cutting blades
- Exceptionally small, handy and manoeuvrable thanks to its short design and compact shearing head
- Also ideal for application in stainless steel
- Flexibility in curves: for radii from 15 mm

Product features

- Easy to exchange 4-sided cutting blades
- Robust and compact shears for the medium power range
- Ideal for continuous use
- Flexibility in curves: for radii from 20 mm

Battery version

- Intelligent battery management, brushless motor and Power Head Technology
- Cordless Alliance System: One battery, many solutions.
 100% compatible with all 18V battery machines

TRUMPF thin sheet nibblers

TRUMPF has developed the perfect tools for plumbers as well as roof and facade constructors: With our thin sheet nibblers, you can work without damaging the surface. You always achieve visually high-quality edges without corrosion or oxidation.

Particular strengths:

 Distortion-free cutting edges without corrosion

Thin sheet nibblers are gentle on surfaces, resulting in visually high quality edges

 Optimal contouring and profiling

Ideal for hard-to-reach places – you can change the cutting direction at any time.

Change without the need for tools

You can change dies and punches quickly, without the need for any additional tools.

Comfortable operation

They work fast and with low vibration with rapid work progress.

Application range for sheet thickness up to 2 mm

Application range for sheet thickness up to 1.6 mm The different tools can be used on all two machines

TruTool N 160

Sheet metal

Corrugated sheet metal

Roofing and facade processing, car construction body construction, switch cabinets

Roofing and facade construction, plumber

*Longitudinal cuts are also possible for higher profiled sheets

TruTool N 160 with extension

metal up to 40 mm

Drywall construction, electrical systems installation

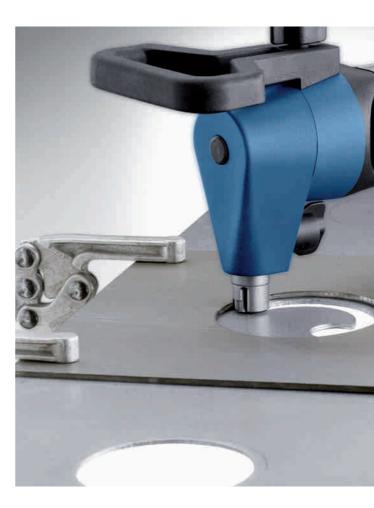

Trapezoidal sheet metal up to 60 mm*

Roofing and facade construction

TRUMPF thick sheet nibblers

Our thick sheet metal nibblers are ideal for coil cutting as well as container and tank assembly and disassembly. Can easily handle even the toughest cases. For example, it cuts over weld seams and bends of up to 90°.

Particular strengths:

 Thick sheet nibblers up to a sheet thickness of 3.5 mm

Equipped with a hollow round punch for 360° rotation on the spot. For the greatest manoeuvrability.

 Area of application from 3.5 mm sheet thickness

Ideal for cuts across edges, welding seams and doubled sheets.

Thick sheet nibblers from a sheet thickness of 5 mm

TruTool

Equipped with a robust rectangular punch, the highest level of profile flexibility is guaranteed.

Area of application up to 5 mm sheet thickness

I Ideal for tank assembly and disassembly. For cutting across edges and bevelled sheets, welding seams and doubled sheets.

Distortion-free work without exertion

Using the thick sheet nibblers, you can work without feed force, distortion or sparks.

TRUMPF panel cutter

The TruTool TPC 165 panel cutter from TRUMPF is the ideal solution for the separation of sandwich panels. It is perfectly suited for roofers, façade, hall and container constructors, as well as for cooling, heating and sound insulation specialists.

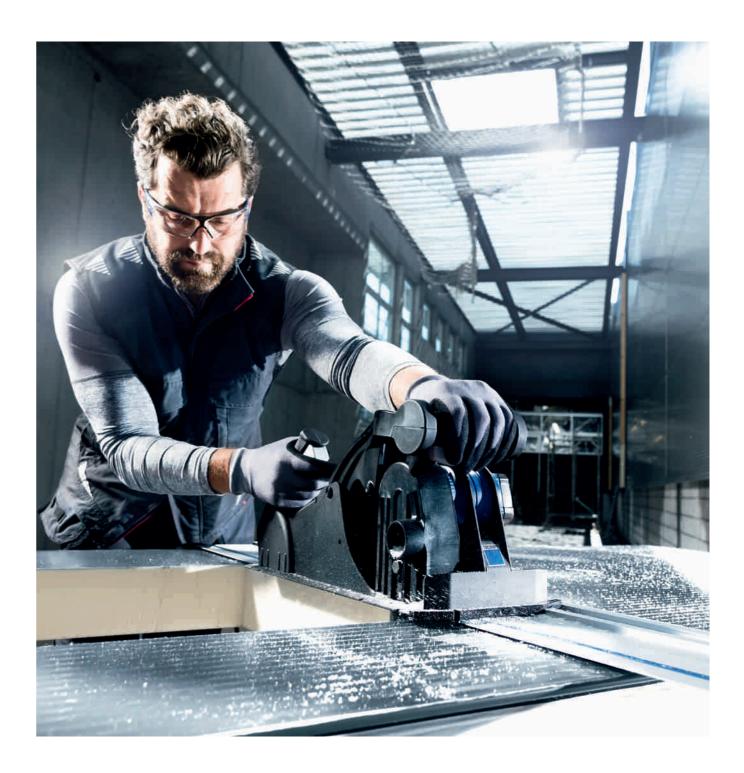

Particular strengths:

Quick work speed

The panel cutter cuts sandwich panels up to 165 mm thick in a single operation.

Dimensionally accurate, perpendicular separating cuts

You can quickly and easily create perpendicular cuts with the blade which can be set to 90°.

Unique insertion mechanism

You can start at any point on the panel without a start hole.

Compact and light

The TruTool TPC 165 weighs just 9.6 kg and is based on a sheet design that is both stable and light.

Comfortable operation

Fatigue is minimised and the machine is simple to operate.

Electric- and cordless tools

Overview panel cutter

Tips:

 Easy-to-see guide marks facilitate precise cuts along the entire cutting line with a consistent and precise cutting depth. The blade can be fixed in 13 different positions. This ensures constant, precise cutting depths.

SPECIAL MACHINES

TRUMPF seam lockers

For heating and ventilation engineers, TRUMPF seam lockers are essential for their daily work, as well as for the construction of façades, fireplace coverings or industrial fans. For both Pittsburgh lock seams as well as angle and standing seams, you will find the correct tool with TRUMPF.

Particular strengths:

• Tight seam joints without force

The seam lockers operate with an automatic feed. This means you achieve a consistently high seam quality.

Comfortable operation

You can work quickly, and with low noise and vibration.

Quick and easy

The seam lockers are ready for use in just a few steps; they are extremely easy to handle.

Mobile use

You can use the seam lockers directly at the assembly point, or flexibly on the construction site.

Electric- and cordless tool

SPECIAL MACHINES

TRUMPF Power fasteners

Whether in ventilation and air conditioning technology, or the construction of containers or apparatus, joining is the most simple and economical method for connecting two metal parts.

Particular strengths:

Perfect connection

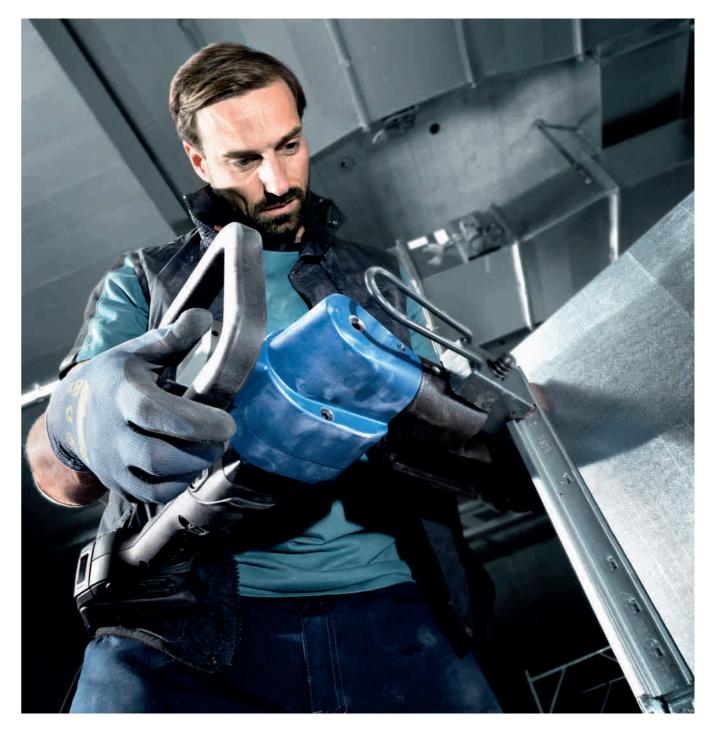

For strong, resistant and corrosion-resistant joints in one operation.

User and environmentally friendly

Low-vibration and quiet operation. The process is also emission-free.

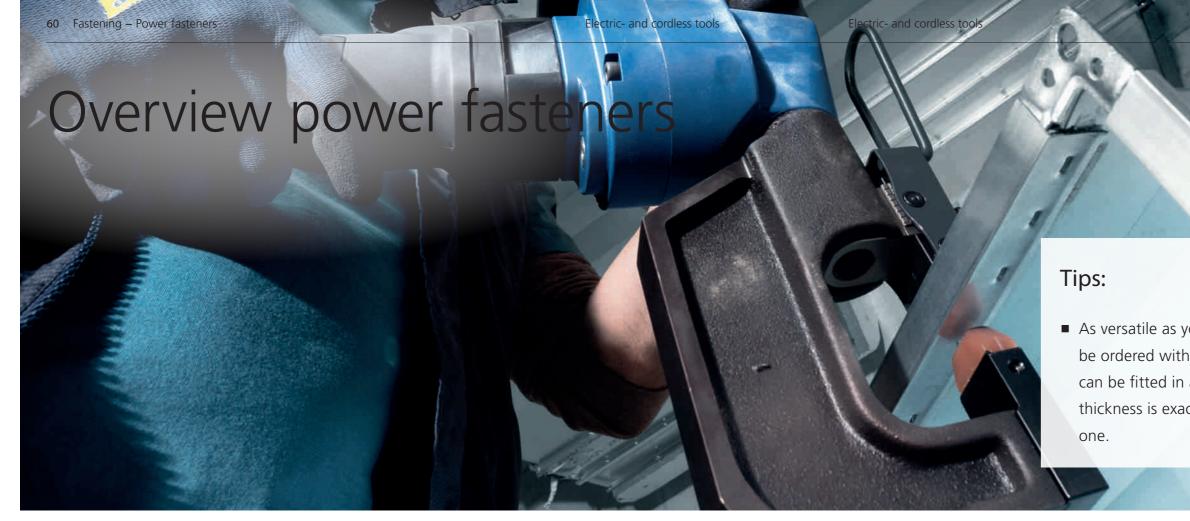

You do not need screws or rivets; interference contours are therefore avoided.

Minimum preparation time

The power fastener can be adapted to the desired application quickly and without problems.

Weight (with battery)	kg	8
Length/height (electric)	mm	411/358
Length/height (battery)	mm	454/358

Included accessories (version with tool)

Punch, tilting arm for punch, die arm fixed no. 3, stripper for straight sheets, stripper for ducts, hex head wrench SW 3, SW 5, and SW 6, grease gun G1, box for small parts, carrying case TF 350

Additional for battery version: 2x battery 18V LiHD 4 Ah, charger LG 12V-36V

Product features

- Rapid stroke rate up to 120 joining points per minute
- Consistently high joining quality on both coated and uncoated surfaces
- Machine can be ordered with or without tools to facilitate individual configuration

Battery version

- Intelligent battery management, brushless motor and Power Head Technology
- Cordless Alliance System: One battery, many solutions.
 100% compatible with all 18V battery machines

Select tool

Depending on the application, the TruTool TF 350 can be fitted with tools in various ways. Depending on the material type and thickness, various dies types are available.

If your total sheet thickness is exactly between two die sizes, choose the smaller one. A special tool holder (= fixed arm or tilting arm), serving as the matrix receiver belongs to every matrix type.

SPECIAL MACHINES

TRUMPF edge trimmers

In machine, rail carriage and ship construction, TRUMPF deburrers are just as established as in steel construction, in job shops for sheet metal processing or in metalworking shops. They are able to produce straight as well as radial edges.

• For the most diverse applications

For chamfering, rounding and deburring of end edges and for preparing welding seams.

Perfect conditions

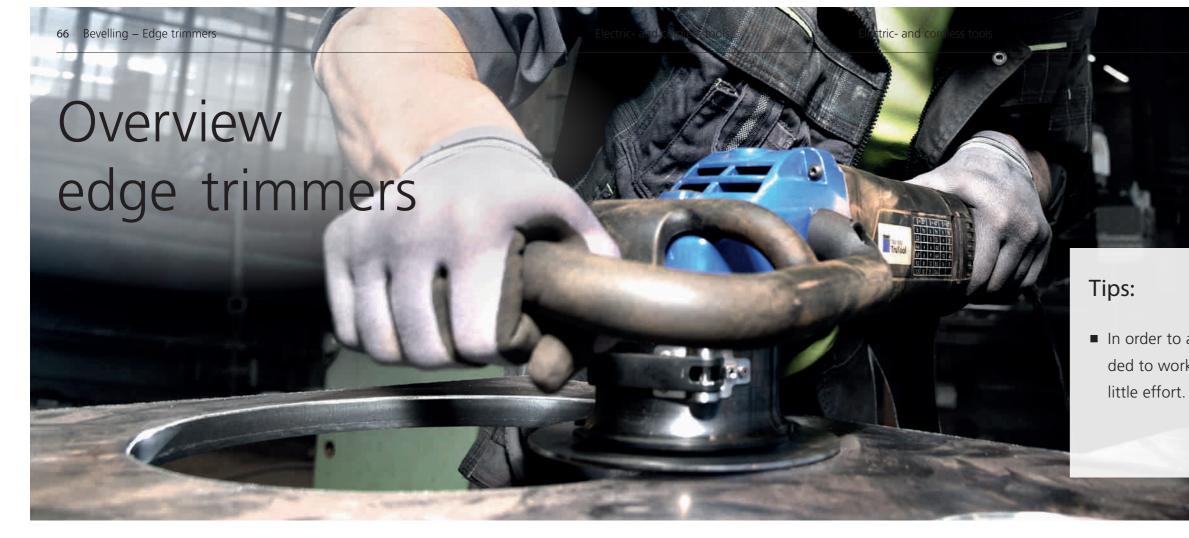

The process is fast and emission-free. The oxide-free surfaces are the ideal preparation for subsequent coatings. The bevel length can be adjusted quickly and without tools.

No reworking

Using deburrers, you can obtain a dimensionally accurate edge of consistently good quality.

Ready for use fast

The chamfer height can be set quickly and without tools.

CUTTING

The bevellers have proven themselves in machine, rail carriage and ship construction, as well as in steel construction, in job shops for sheet metal processing and in metalworking shops. They ensure even, oxide-free and metallically smooth edges on flat sheet metal, tubes, interior cutouts and curves.

No reworking

With the beveller, you can prepare high-quality welding seams in a single operation.

Long tool life

The cutting tools can be reground many times.

High-quality welding seams

Precise surface roughness and oxide-free surfaces guarantee highly durable weld connections.

Perfect results

Cutting edges free from emissions and oxides ensure metallically free K, V, X and Y edges.

• The right setting

It is quick and easy to adjust the settings for the chamfer height and sheet thickness.

Quick working speed

The beveller enables you to progress quickly with your work.

Bevel length (ls) for all bevel angles. Bevel height (hs) for 45°.

With the TruTool TKF 700 you have the choice of three carriers with angles of 30°, 37.5° and 45°. The TruTool TKF 1500 models allow you to continuously adjust the bevel angles from 20° - 55°.

Cutter standard, roller guide cpl., grip, TORX screwdriver, screwdriver SW 4, hex head wrench SW 5, grease gun G1, TRUMPF Box M3

Product features

- Mount pieces for bevel angles 30°, 37.5° or 45°
- You can rotate the cutting direction by 90° to the right or left
- Pipe processing with inner diameter from 80 mm
- Interior cut-outs from diameter 90 mm and radii from 40 mm

TRUMPF fiber composite nibber

The benefits of nibbling technology can now also be exploited for different fibre composite materials, such as carbon fibre, fibreglass or even aramid fibre composite materials. With the TruTool FCN 250 Fiber Composite Nibbler, you will be able to cut components with up to 2.5 millimeter material thickness.

Particular strengths:

Broad range of applications

The fiber composite nibbler enables you to process CFRP, GFRP, AFRP, thermosetting plastics and thermo plastics.

Exceptional cut quality

No delamination or fraying due to the slitting process.

Health-conscious working

Cold process without smoke. No harmful formation of dust.

Complete processing freedom

You can cut flexibly in any direction you need thanks to the 360° tool.

Electric- and cordless tools

TruTool FCN 250

Quick & Easy

verview bre composite nibble

Tips:

The cutting tools are made of high tensile materials. Good cutting results, long tool life and low operating costs are the result. If you mainly process CFRP, select the specially designed punches and dies.

SPECIAL MACHINES

TRUMPF slat cleaner

The slat cleaner cleans the slats of your laser flatbed machine quickly and several times over. This means you can use the slats for considerably longer. The machine can be operated simply by one person.

Particular strengths:

Diverse area of application

Well-suited for a variety of materials, even for stubborn stainless steel slag.

Highest quality

Slats which are cleaned regularly increase process reliability and the quality of the produced parts.

Multiple cleaning

Multiple cleaning means an increased service life before having to replace the slats.

Automatic adjustment

The slat cleaner automatically adapts to different slag thicknesses of up to 25 mm.

Slat cleaner

Tips:

 An integrated LED display immediately informs the operator when the seal needs to be replaced. This is how the intelligent monitoring system prevents major damage to the machine and ensures safe working processes.

Noise and vibrations Information

Measured values determined according to EN 60745

The vibration emission level given in this information sheet has been measured in accordance with a standardised test given in EN 60745 and may be used to compare one tool with another. It may be used for a preliminary assessment of exposure.

The declared vibration emission level represents the main applications of the tool. However if the tool is used for different applications, with different accessories or poorly maintained, the vibration emission may differ. This may significantly increase the exposure level over the total working period. An estimation of the level of exposure to vibration should also take into account the times when the tool is switched off or when it is running but not actually doing the job. This may significantly reduce the exposure level over the total working period.

Identify additional safety measures to protect the operator from the effects of vibration such as: maintain the tool and the accessories, keep the hands warm, organisation of work patterns.

Туре	Vibration emission value ah (vector sum of three directions	Uncertainty for vibration emission value	A-assessed sound pressure level	A-assessed sound power level	Uncertainty for noise emission values	
	ah [m/s2]	k [m/s2]	Lpa [dB(A)]	Lwa [dB(A)]	k [dB]

General terms and conditions

Delivery terms

For the delivery of the products listed in this brochure, the relevant valid terms and conditions of delivery are standard.

Warranty

For TRUMPF electric and cordless power tools, the term of liability is 12 months as of the date of invoice. Damages that are traced back to natural wear and tear, overstress or improper use of the machine are excluded from the warranty. Damages that occur due to material or manufacturing defects or errors will be handled by a replacement delivery or repaired free of charge. Claims can only be accepted if the device is sent back to your TRUMPF dealer without having been disassembled.

ISO certification

All electric and cordless-operated tools produced in our production facilities are certified according to ISO 9001.

Nominal voltages

In general, the corresponding country models are available for all machines. Please contact your TRUMPF sales office for additional details.

Subject to changes

We reserve the right to change data as well as correct mistakes and print errors; liability for such is excluded. Technical data, in particular, are subject to change without prior notification. Individual features may differ depending on country-specific issues.

CE conformity

All electric and cordless-operated tools in this catalogue adhere to the provisions of the respectively relevant EU directives.

Service

TRUMPF offers worldwide repair service centers. Please contact your regional sales office so that repairs can be made by our trained specialists.

Operating manuals as well as spare parts lists are delivered along with the machines. If these documents are lost, replacements are available for download at www.trumpf-powertools.com.

Please use only original spare parts as well as original accessories from TRUMPF. This guarantees trouble-free machine use and, in case of a claim, acceptance of your warranty claim.
