Press Release – Open House 2023

Another successful Open House took place at TRUMPF in Luton on the 12th and 13th July 2023 where TRUMPF opened the doors to their customers so they could see the latest machine tool and laser technology solutions.

As in previous years this year's Open House is proof of the vital need to meet face to face with customers and once again, TRUMPF were delighted with the number of visitors that walked through the door.

A total of 170 visitors were welcomed over the two days and the feedback has been extremely positive with many customers taking the time to say what a *great show, great atmosphere, impressive day* it had been. Several orders were completed during the two days of Open House which made it another successful event.

During the day visitors had the opportunity to choose among various sessions to discuss topics, the highlights that were showcased were EdgeLine Bevel for automatically creating chamfers while laser cutting, automated welding and the latest sheetmetal software developments with TRUMPF OSEON.

There was prime opportunity to see the latest laser cutting, punching, welding, bending and laser marking technology live in action with technical experts on hand to talk face to face with our customers.

There were also celebrations in Germany and globally with TRUMPF Headquarters having reached an extraordinary milestone of 100 years.

TRUMPF look forward to welcoming their customers to Open House in the Summer of 2024.
