TRUMPF

- TruPrint 1000 Green Edition
- TruPrint 3000
- TruPrint 5000
- TruLaser Cell 3000
- DepositionLine
- TruMark Station 7000

3D-Printing

- 3D-Printing (Additive Manufacturing) – the process of creating a three-dimensional object from a digital file.
- Additive Manufacturing – the process of creating a three-dimensional object from a digital file.

Introduction

toolcraft is a leading provider of industrial laser technology (ILT) in Europe. The company's portfolio includes a wide range of laser systems for industrial applications, from laser cutting and welding to laser marking and laser-based material processing. toolcraft AG is a subsidiary of the TRUMPF Group, which is a leading manufacturer of industrial machines and systems. toolcraft AG was founded in 2011 and has since grown into a major player in the industrial laser market. In 2019, toolcraft AG was acquired by LMD (Laser Machine Division) of the TRUMPF Group. toolcraft AG is a leading provider of industrial laser technology (ILT) in Europe. The company's portfolio includes a wide range of laser systems for industrial applications, from laser cutting and welding to laser marking and laser-based material processing. toolcraft AG is a subsidiary of the TRUMPF Group, which is a leading manufacturer of industrial machines and systems. toolcraft AG was founded in 2011 and has since grown into a major player in the industrial laser market.
